

Thyme Sparkling Bright

Thymus spp.

Height:	Tbc. Upright growth habit
Suitable for:	Any sunny location in dry, well drained soil. Ideal for pots and containers.
Summary:	A brand new upright thyme recommended by our plug suppliers which, from the pictures, looks a little like our favourite Silver Posie but with brighter and even better variegation. We shall know more when as the plants grow and develop, from the photographs of the foliage it looks stunning!

More information:

It will require the same growing conditions as all other thymes.

A sunny spot is required, in a dry, well drained soil without lots of added fertiliser. This upright growing thyme will combine well with other thymes, rosemary etc in a herb garden, and also grow well in gravel and rock garden areas and create a bright & colourful display in pots and containers.
